

FEATURESOPERATIONNotice:

- Each size suit for plate type & round type steel using.
- All new models with " light weight" less dimension" and " lower price".
- Made by permanent magnet, require no power supply, thus eliminating hazards due to failure wiring system as electric type.
- It features powerful magnetic force, with 3.5 times safety coefficient makes more safety in use.

OPERATION

With ON/OFF switch, it is very easy and convenient to operate.

See as the example pictures as below

Notice:

Never moves the handle to "ON" side, except on an iron object of holding.

OFF

 Never operate over human's head.

Permanent Magnetic Lifter Convertex®

APPLICATIONS

Suitable for move plate steel, block steel and round steel, such as machine parts, press molds, plastic molds and iron materialetc.

MAGNETIC LIFTER

LOAD OF HOLDING POWER

• The load of holding power will changes depending on the thickness, attractive face roughness and quality of material and clearance between the workpiece with magnet.

	Thi	ckness		Perce	entage of	lifting cap	Table of difference in holding Table of difference in holding							
	mm	inch	VML-3000	VML-2000	VML-1000	VML-600	VML-300	VML-100	power by attractive face power by material quality

T10	15	0.59"	30%	35%	50%	60%	70%		Calculating Formula for					
T11	10	0.39″	20%	25%	35%	45%	50%	70%	"Range of Lifting Capacity" → (TxFxMxCapacity of Lifter) Example:					
T12	5	0.20"	10%	15%	20%	25%	30%	40%						

Terms of workpiece: T8, F1 and M2 90% x 125% x 85% x 600kgs (VML-600)=573kgs

SAFETY COEFFICIENT x 3.5 times

The capacity of magnet indicated as 1/3.5 of holding power, it means the real holding power is 3.3 times of capacity. For example the capacity of VML-600 is 600kgs (1320lbs) but the real holding power is 1980kgs (4350lbs).

The large safety coefficient is consideration for ensuring the use in safety.
